

**The Royal Jhoola in Bhimvilas**

The Jhoola is suspended in the center of dressing room of the queen with Brass chains attached with a Wooden plank to sit on. The brass chain has carving of ornaments and animals to give it a royal look. It is said that the queen would sit on a 'gadda' placed of the wooden plank and dress up for the king talking and gossiping with her 'sakhis'. The dressing room is well decorated with detailed murals and mirrors. The room is directly connected to the bathak room where the king, Maharana Bhimsingh and the queen would play board games and hold nuclear gatherings.

Traditional Interior Architecture Elements

## Kalaa

### Celebrating Craftsmanship

The exhibition unfolds in Lakshmi Chowk of City Palace, Udaipur. The city which itself is rich in its heritage and art. This exhibit shows the various furniture pieces and objects of great workmanship originated in **Rajasthan**. The vernacular furniture like Peti, bajot, kathatara, sirhaasan, majju, chaarpasai, pidha rich in carving and detail will be put to display. The exhibition is all about experiencing the exquisite furniture pieces.

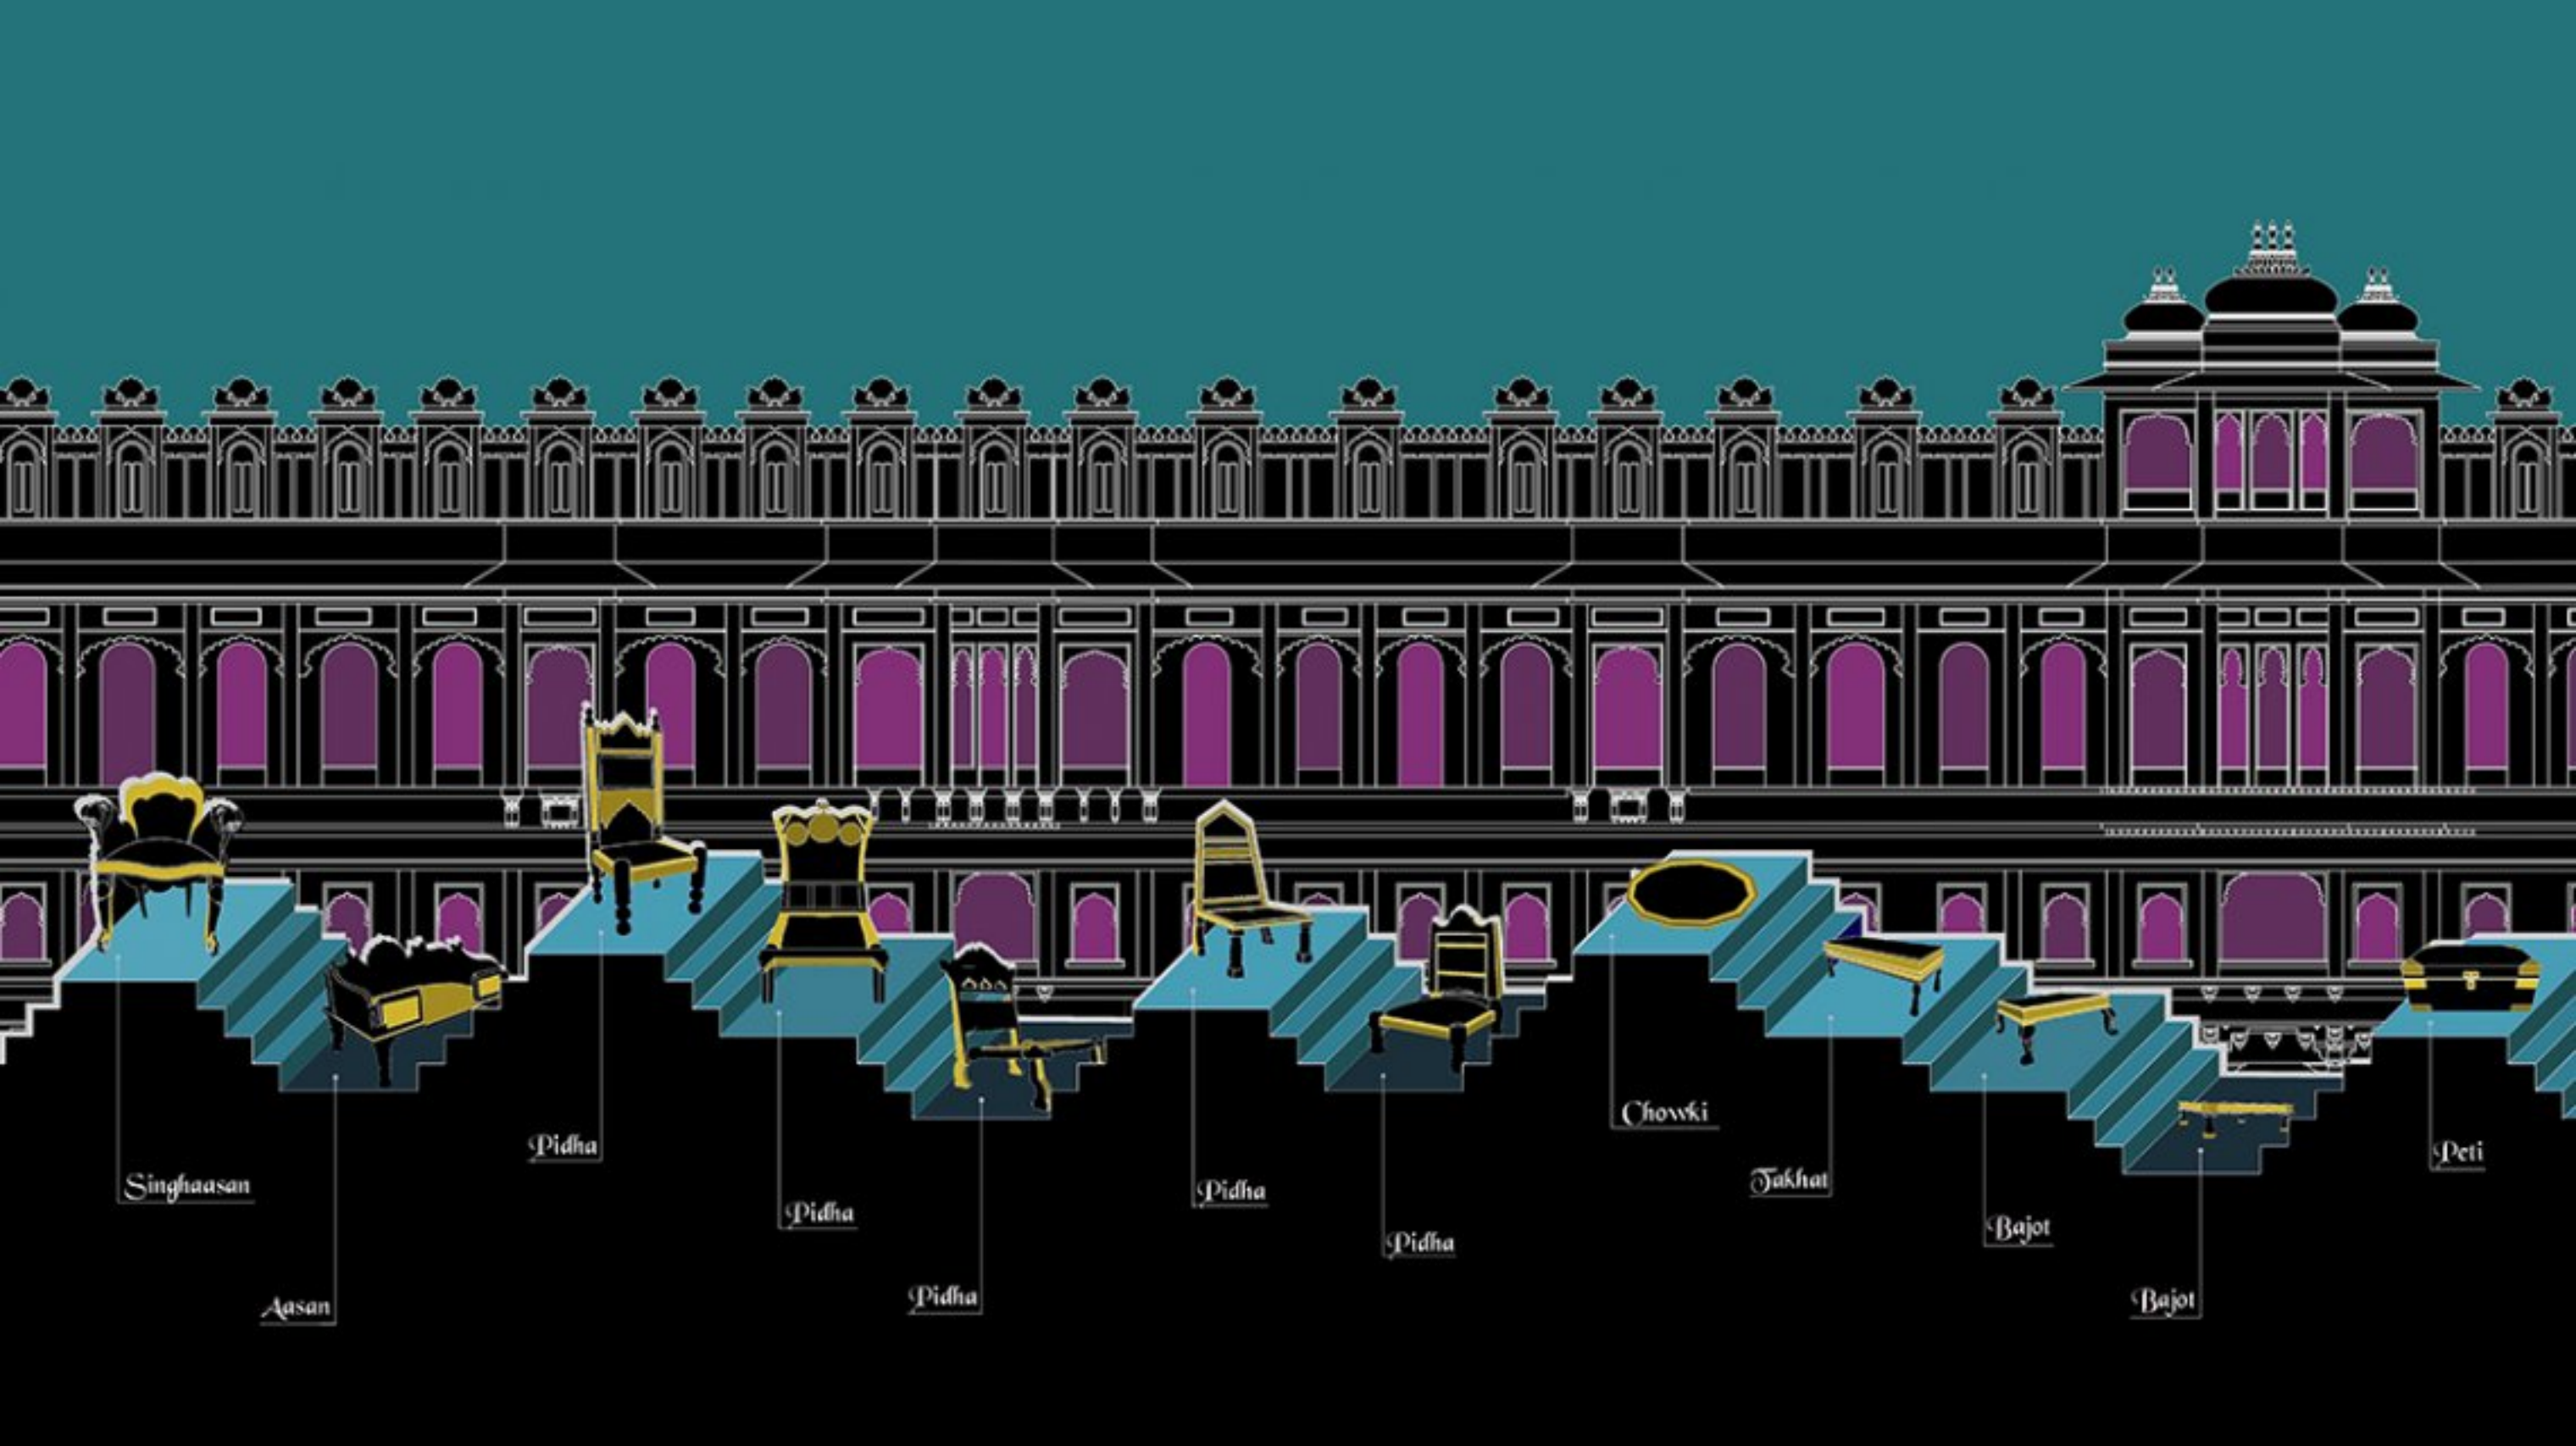

It is curated keeping in mind that every material and technique of ornamentation is appreciated in its **workmanship**. The viewers are going to be able to isolate themselves with the furniture piece to observe it and know its process in detail. The attention given to each curve and groove by skilled hands are going to remind the viewer of the glorious times that still exist in these pieces of the past.

Each day the visitors will experience a different environment created by various guest artists, playing traditional instruments and dancing to each taal to show the importance of details in every field.
